INTERNATIONAL ACLIMINARY EXAMINATION REPORT

International application No.

PCT/AU2003/001391

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1.	Statement		
	Novelty (N)	Claims 2-9, 11	YES .
		Claims. 1, 10, 12, 13	NO
	Inventive step (IS)	Claims 4, 5	YES
		Claims 1-3, 6-13	NO
	Industrial applicability (IA)	Claims 1-13	YES
		Claims	NO

2. Citations and explanations (Rule 70.7)

The following documents identified in the International Search Report have been considered for the purposes of this report:

D1: US 4714118

D2: US 6109370

D3: WO 97/21900

D4: US-5322134

Novelty (N) Claims 1, 10, 12, 13

Each of documents D1, D2 and D3 explicitly discloses the invention defined in claims 1 and 13. See for example, claim 1 and column 3 line 10 to column 5 line 11 in D1. Documents D2 and D3 each disclose the feature of claim 12 (see claims in D3). D1 also discloses the feature of claim 10 (column 5 lines 12-61). Whilst there is no disclosure in D4 of a flexible hose (as defined in claim 1), the document does refer to the use of retro jets and an offset jet defined in present claims 12 and 13.

The invention defined in claims 1, 12 and 13 is also explicitly disclosed in a later published document WO 2003/042491 (see Box VI).

Therefore the subject matter of these claims is not new and does not meet the requirements of Article 33(2) of the PCT with regard to novelty.

Inventive Step (IS) Claims 1-3, 6-13

Claims 1, 10, 12 and 13: as above

Claims 2, 3, 6-9: none of the cited documents disclose the features of appended claims 2, 3 and 6 to 9. However, the features added by these claims are either typical in devices of this type or are a mere workshop variation and, as such, cannot be considered as contributing to patentable ingenuity.

Claim 11: Document D3 discloses the use of a ring as part of a deflecting assembly to assist in steering the cutting apparatus of the fluid drilling system. There is no disclosure of this ring being assymetrical to the drilling head. However, an assymetrical gaging ring (as defined in present claim 11) is well known in the art (see for example WO 2003/042491 - cited in BoxVI).

Therefore the subject matter of these claims is not obvious and meets the requirements of Article 33(3) of the PCT with regard to inventive step.

Industrial Applicability (IA)

The invention defined in the claims is considered to meet the requirements of Industrial Applicability under Article 33(4) of the PCT because it can be made by, or used in, industry
